EXPERIENCE

Edduus Pty Ltd.

Remote

Founding Full Stack Engineer

Aug 2021 - **Present**

- Built from 0 to 1 a cross-platform mobile app that offers various educational communities for the user to join and interact with like-minded people. Main features include live streaming, article/Q&A posting, video uploading, and real-time messaging via FireBase.
 - **Tech:** JavaScript, TypeScript, React.js, React Native, FireBase, OpenAI for Q&A answering
- Built a SaaS content management platform alongside the mobile app for community managers. Users with specified roles in a community can manage the content posted to a community, as well as create learning units and courses for members to participate in.
 - **Tech:** JavaScript, React.js, CSS/SCSS, OpenAI for assisting in content creation
- Platforms share a Node.js server for API-routing, data storage management, and public routing for services like iOS/Android real-time notifications
 - **Tech:** JavaScript, Node.js, MongoDB, Express for API routing, Python for some automation

Software Engineer

Aug 2021 - May 2022

- Implemented features for a SaaS video conferencing platform, including an interactive whiteboard, live recording for the conference and a real-time messenger for teachers to chat with their students.
 - **Tech:** Node.js/Postgresql, React.JS, pure JavaScript, Socket.IO for real-time messenger

IntelleXt

Remote

Frontend Developer

Feb 2021 - Aug 2021

- In charge of wireframing and developing the website for IntelleXt, a startup that aims to streamline contractual work via machine learning AI
 - **Tech:** HTML/CSS, JavaScript, Wix, WordPress, Figma for wireframing

NCAPDA

Concord, CA

Website Support Manager

Jan 2020 - Dec 2020

- Updated and maintained pages for a non-profit organization that is involved in spreading prescription drug abuse awareness
 - **Tech:** HTML/CSS, JavaScript, WordPress

PROJECTS

Pac-man. Recreated AI driven Pacman games to learn various machine learning algorithms

- Python

Briscola Online. Made a real-time web application for playing Briscola, a classic Italian card game

- React, Socket.IO, and MongoDB was used, with Heroku as the web host
